# High Tunstall College of Science Curriculum Intent 

Topic: Application of Computational Thinking<br>Topic 1 and Topic 6: Problem Solving with Programming<br>Basics of Programming

Year: 10
Half Term: 1

|  | Progress |  |  |
| :---: | :---: | :---: | :---: |
| Key Ideas | R | A | G |
| I can use arithmetic operators |  |  |  |
| I can use variables in algorithms and programs |  |  |  |
| I understand the term decomposition |  |  |  |
| I understand the term algorithm |  |  |  |
| I understand programs must be written in the correct sequence |  |  |  |
| I can interpret error messages |  |  |  |
| I can recognise the data types; int, real(float), char, string |  |  |  |
| I can define the term variable |  |  |  |
| I can create variables with appropriate names (using camelCase) |  |  |  |
| I can use a variable to store data and recall the contents of a variable |  |  |  |
| I can translate code into a flowchart algorithm |  |  |  |
| I can represent algorithms as flowcharts |  |  |  |
| I can translate a flowchart algorithm into code |  |  |  |

| Lesson | Learning Focus | Assessment | Key words |
| :---: | :---: | :---: | :---: |
| 1 | define the term 'program' <br> use an Integrated Development Environment (IDE) to work with <br> a Python program <br> use arithmetic operators <br> use variables in algorithms and programs | Evidence in Teams End of topic assessment | Algorithm, Arithmetic, BIDMAS, Deterministic, Integrated Development Environment (IDE), Operators, Program, Programming Language, Syntax |
| 2 | define the term 'decomposition' <br> define the term 'algorithm' <br> define the term 'sequence' and use sequence in algorithms and program code <br> interpret error messages | Evidence in Teams End of topic assessment | Algorithm, Comments, Decomposition, Errors, Sequence, Interpret |
| 3 | recognise primitive data types (int, real(float), char, string) define the term 'variable' create variables of all types with meaningful names view contents of memory (variable) in IDE. | Evidence in Teams End of topic assessment | Boolean, camelCase, Char, Data types, Float, Integer, String, TypeError, Variable |
| 4 | take input and create output define the term 'runtime error' find and fix runtime errors use primitive data types (int, real, char, string). | Evidence in Teams End of topic assessment | Assignment, Data types, Errors, Input, Prompt, Runtime, Runtime error, Type conversion, Value Error |
| 5 | translate code into flowchart symbols represent an algorithm in a flowchart translate a flowchart into code | Evidence in Teams End of topic assessment | Algorithm, Constant, Flow, Flowchart, Input, Output, Process, Symbol, Terminator, |
| 6 | Revision lesson All of the above | Evidence in Teams End of topic assessment | All of the above |
| 7 | End of topic Assessment | End of topic assessment | All of the above |
| 8 | Assessment feedback lesson | Evidence in Teams | All of the above |
