# High Tunstall College of Science Curriculum Intent 

| Topic:Principles of Computer Science <br> Topic 2: Data <br> Binary Year: | 10 | Half Term: | 1 |
| :--- | :--- | :--- | :--- | :--- |

|  |  | Progress |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Key Ideas | R |  | A | G |  |
| I understand that computers use binary to represent data (numbers, text, sound, graphics) and program instructions and <br> be able to determine the maximum number of states that can be represented by a binary pattern of a given length |  |  |  |  |  |
| I understand how computers represent and manipulate unsigned integers and two's complement signed integers |  |  |  |  |  |
| I can convert between denary and 8-bit binary numbers (0 to 255, -128 to +127) |  |  |  |  |  |
| I can add together two positive binary patterns and apply logical and arithmetic binary shifts |  |  |  |  |  |
| I understand the concept of overflow in relation to the number of bits available to store a value |  |  |  |  |  |
| I understand why hexadecimal notation is used and be able to convert between hexadecimal and binary |  |  |  |  |  |

| Lesson | Learning Focus | Assessment | Key words |
| :---: | :---: | :---: | :---: |
| 1 | Define what is meant by the term 'digital computer' <br> Give examples of different types of computer | OneNote work Socrative | Computer, Digital, Embedded, Laptop, Peripheral, |
| 2 | Define what is meant by the terms: 'binary' and 'bit' <br> Explain why binary is used to represent data and program instructions in a computer <br> Describe the relationship between the number of bits and the range of values that can be represented by them. | OneNote work Socrative | 2n, Binary, Bit, Component, Denary, Encoding, Off, On, Transistors |
| 3 | Define the terms nibble and byte <br> Convert between denary and binary numbers | OneNote work Socrative | Binary, Byte, Denary, Integer, Most Significant Bit (MSB), Negative, Nibble, Place value, Positive, Signed binary, Unsigned binary |
| 4 | Add together two positive 8-bit binary patterns <br> Define what is meant by the term 'overflow' error <br> Describe the effects of an overflow error | OneNote Socrative | Addition, Binary, Error, Overflow, Place value, Unsigned binary |
| 5 | Differentiate between signed and unsigned integers <br> Describe how positive and negative numbers are represented in two's complement <br> Find the two' complement of a signed binary number | OneNote work Socrative | Conversion, Negative numbers, Sign and Magnitude, Signed binary, Two's complement, Unsigned binary, |
| 6 | Revision lesson All of the above | Evidence in Teams <br> End of topic assessment | All of the above |
| 7 | End of topic Assessment | End of topic assessment | All of the above |
| 8 | Assessment feedback lesson | Evidence in Teams | All of the above |
